## DETAILED ACTION

### *Response to Arguments*

Applicant's arguments, see amendment, filed 3/15//2006, with respect to claims 1-3 have been fully considered and are persuasive. The rejections of claims 1-3 have been withdrawn.

### *Allowable Subject Matter*

Claims 1-6 are allowed.

The following is an examiner's statement of reasons for allowance:

Re claims 1-6, the prior art fails to teach or suggest, "A digital camera comprising; an imaging device for imaging a subject and outputting an image signal representing a subject image obtained by the imaging; a zoom lens whose focal distance can be changed; a focus lens for focusing; **a focus detecting circuit for detecting a focusing position of the focus lens on the basis of integration values of the image signal outputted from the imaging device; distance measurement means for measuring the distance to the subject on the basis of the focusing position of the focus lens detected by the focus detecting circuit; a signal amplifier**

Art Unit: 2622

for amplifying the image signal outputted from the imaging device; first judgment means for judging whether or not the irradiation distance of a strobe which is obtained on the basis of the f-stop value of the zoom lens is shorter than the distance to the subject which is measured by the distance measurement means; and amplification factor control means for increasing the amplification factor of the signal amplifier when the first judgment means judges that the irradiation distance of the strobe is shorter than the distance to the subject”.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
